

# Regatta Thermo Cruise Baby

Babies lose body temperature faster than adults and the heat insulating properties of Thermo Cruise are therefore of special importance in a baby's lifejacket. Regatta AS has developed an thermal lifejacket for protection of our babies and children. Children are more exposed for losing body heat and Regatta Thermo Cruise is specifically developed to prevent this. The lifejacket is approved for as well leisure (EN 395) as professional use (SOLAS).
