Speedlink, the new trigger snap schakle:

- > Ultra lightweight
- > Excellent weight/performance ratio
- > Easy, controlled opening
- > Outstanding working and breaking loads

LIGHTWEIGHT:

Speedlink was developed using finite element analysis software and has an optimised design. Its shape, cut-outs and ribs make it extremely light and give it one of the best strength/weight ratios on the market.

A MODERN DESIGN...

Speedlink's ultra-technical lines make it one of the most modern and efficient snap shackles available.

- The special load-bearing surface of the swivel eye avoids excessive rope wear.
- Its overall design prevents adjacent lines from jamming.

... FOR EFFICIENT OPERATIONS

- Easy opening: opening under load, whether manually or using the release fid, is easy and effortless thanks to the generous passage diameter and its optimised slopes.
- No accidental opening: the special shape of the latch reduces inertia and avoids unintentional opening, especially under impact, while the distribution of stresses limits the effort needed to open it under load.

STURDY:

Speedlink is forged in HR stainless steel and can bear exceptional working and breaking loads for a minimum weight.

Technical data:

- > Part number: 2650
- > With swivel eye
- > Material: forged high resistance stainless steel
- > Length: 74 mm
- > Weight: only 0,052 Kg!!
- > Working load: 1100 Kg
- > Breaking load: 2300 Kg
